DETAILED ACTION

Response to Amendment

1. In response to the Amendment received on 4/30/2008, the examiner has carefully considered the amendments. The examiner acknowledges the addition of claim 13, as well as, the amendment to claim 1.
2. The Declaration under 37 CFR 1.132 filed 4/30/2008 is sufficient to overcome the rejection of claims 1-5 and 8-12 based upon Nachtkamp et al (5,804,647) in view of Ingrisich et al (6,464,127) as set forth in the last Office action because: Although the Declaration on its merits, comparative examples between Nachtkamp et al and the instant invention {specifically compositions A (example 1 of Nachtkamp et al) and G (example 1 of the instant invention) are not comparative}, are not convincing, the Declaration has successfully shown that the primary reference Nachtkamp et al does not teach using at least one polyol containing crosslinkable groups having two or more isocyanate-reactive groups and a molecular weight from 500 to 6000 g/mol (applicant's claimed component (Aiv)) combined with reconsideration of the reference (Nachtkamp et al) and the record as a whole, it is deemed that Nachtkamp et al does not teach such a compound in the method of making a polyurethane. While Nachtkamp et al does teach that in the event that the polyurethane has terminal urea groups present, e.g. from the reaction of the terminal NCO groups with ammonia, the polyurethane has reactive sites for crosslinking reactions--see column 7, lines 12-14, Nachtkamp et al additionally teaches converting the urea end groups to methylol by reaction with formaldehyde that can be crosslinked via the addition of an external crosslinking agent, such as with melamine resins--see column 7, lines 14-17. This is distinguished from applicant's component (Aiv) which is at least one polyol containing crosslinkable groups and having at least two or more isocyanate-reactive groups and having a molecular weight from 150 to 6000 g/mol.

The examiner deems that the Declaration on its merits is not comparative for at least the following reasons: example 1 of Nachtkamp et al (composition A in the Declaration) is not comparative to Example 1 of the instantly claimed invention (composition G). Composition G has optional component (vi), the DC 1248 fluid (polysiloxane polyol), which may or may not effect applicant's film formation properties. The declaration states that example 1 of Nachtkamp et al teaches using 5. 8 wt% of 2, 2-dimethyl-1,3-propanediol which the examiner is assuming

applicant means 2,2-dimethylol-propionic acid (since applicant is comparing the diol (see the Declaration) to component (ii) of the claims and the 2,2-dimethylol-propionic acid of Nachtkamp et al is found in the amount of 5.78 or 5.8–wt%), the overall teachings of Nachtkamp et al state that the component represented by the 2,2-dimethylol-propionic acid (component C) can be used in amounts from 2 to 12%, wherein at least the 2 to 4% range read on applicant's component (ii) range as found in the claims. Thus composition A would have been a closure comparison if component (ii) was used in the range from 2 to 4% and not the 5.8% of the example which is outside the claimed range. Another reason for lacking sufficient evidence is described above. There is no (iv) component disclosed or taught by the reference. However, as stated above Nachtkamp et al does not teach, alone or in combination, a compound having crosslinkable groups, having at least two or more isocyanate groups and a molecular weight as defined in claim 1.

Response to Arguments

3. Applicant's arguments, see Declaration/Remarks/Amendment, filed 4/30/2008, with respect to claims 1-5 and 8-12 have been fully considered and are persuasive. The rejection of claims 1-5 and 8-12 under 35 USC 103(a) as being unpatentable over Nachtkamp et al (5,804,647) in view of Ingrisich et al (6,462,127) has been withdrawn.

Allowable Subject Matter

4. Claims 1-5 and 8-13 are allowed.

5. The following is an examiner's statement of reasons for allowance: As stated above although the Declaration on its merits was not convincing, said Declaration shows that the primary reference does not teach using component (iv) as defined in the claims. Thus the instant invention is distinguished over the closest prior art, alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
